

HIGGS BUNDLES AND RELATED TOPICS

ABSTRACT. In this seminar, we are trying to learn basic topics on Higgs bundles, and mainly focus on the relations between Hermitian-Yang-Mills equation and slope stability. The main reference is Hitchin's celebrated paper [[Hit87](#)].

0. SCHEDULE

0.1. **Lecture 1: Self-dual equations (Baiting Xie).**

-
-
-

0.2. **Lecture 2: Vanishing theorem (Qiliang Luo).**

-
-
-

0.3. **Lecture 3: Stability of rank two Higgs bundles (Bowen Liu).**

- Stable rank two Higgs bundles over projective line and elliptic curve;
- Stable rank two Higgs bundles over curves of general type;
- Endomorphism of stable Higgs bundles;
- Remarks on higher ranks and positive characteristic case.

0.4. **Lecture 4: An existence theorem.**

-
-
-
